

EDW. H. CLARKE, M. D.

18 Arlington Street,

BOSTON.

Jan. 4 1875

Wm Lloyd Garrison

Dear Sir,

I am glad to get so good an account of your knee. There were only two courses to be pursued. graduated exercise, or complete rest. In your condition experiment alone could determine which was the proper one. Having ascertained that rest is the proper one, give it a fair trial so that Nature shall have a fair chance to exert her great recuperative power. Do this, and you will repair your knee

It would be difficult
to say whether your views
differed from mine on female
suffrage, and Co Education
or not, for on those points
I have no views, except that
woman must be left physio-
logical sound. Provided this
done, I have no objection to
any career for her any more
than for man.

Very truly Yours
Edw. H. Clark
